

## SH 99 Grand Parkway Segments H, I-1 & I-2

Construction work on SH 99 Grand Parkway Segments H, I-1 & I-2 is moving full steam ahead. As you travel through these areas, there will be some obvious and not so obvious construction work in effect.

### ***SEGMENT H*** - SH 99 near IH 59/69 in New Caney to FM 1413 in Dayton

Crews have begun the construction of drill shaft foundations, bridge substructures, retaining walls, and reinforced concrete pipe drainage near US 59/69. Drainage, utilities, roadway embankment, retaining walls, and bridge substructure operations are expected to begin between FM 1010 near Plum Grove and Luce Bayou in Spring 2019.

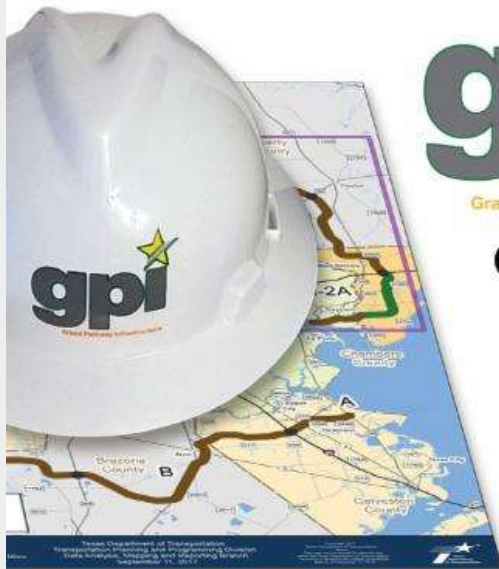

### ***SEGMENT I-1*** - FM 1413 in Dayton to SH 146 in Mont Belvieu

Construction work begins May 2019 with the embankment process which requires trucking in earthen material that is placed and compacted to raise the grade of the new roads.

## **SEGMENT I-2 - West of Hwy 146 in Mont Belvieu to SH 99 in Baytown**

A new eastbound frontage road is currently underway between Cedar Bayou and FM 1405. MSE wall construction will commence later this month at the FM 1405 intersection. Substructure for 10 individual bridges have begun South of IH-10 including a single bridge that will span over IH-10. Roadway work at the Wyoming Intersection is underway; this work will kickoff a complex phasing plan from Wyoming Street to Lee Drive.

## **gpi** Employment Opportunities

Grand Parkway Infrastructure

**GPI is looking for skilled and unskilled labor to work on the SH 99 Grand Parkway.**
